Tanish Raj

Senior Frontend Engineer

Abu Dhabi, UAE hire.tanishraj@gmail.com tanish.im LinkedIn GitHub

Profile

Senior frontend engineer with ten years of experience across banking, private credit and enterprise software. I build design systems, modernise legacy applications and deliver accessible, data-intensive interfaces. My recent work extends into full-stack products and AI assistants, with ownership of architecture, implementation and review.

Experience

Liquidity Capital

2024 – Present

Senior Frontend Engineer / Abu Dhabi

- Lead the migration of legacy private-credit modules to React and TypeScript, integrating Redux and Apollo GraphQL for financial workflows.
- Built a shared UI kit with brand themes, Storybook, Tailwind CSS, AG Grid Enterprise and charts; applied it across the platform rebrand.
- Build the firm's LibreChat-based AI assistant, rendering design-system components inside chat with live platform data.
- Develop an MCP server that exposes design-system components and previews to coding agents before implementation.

Banque Saudi Fransi

2022 – 2024

Senior Frontend Engineer / Dubai

- Built the Customer Happiness Portal and Digital Banking app using React, TypeScript, Next.js and React Native.
- Led the frontend rebrand across legacy banking platforms, introducing a consistent design language and reusable components.
- Improved page loading through code splitting and lazy loading; partnered with DevOps on CI/CD, monitoring and alerting.

Wells Fargo

2021 – 2022

Senior Frontend Engineer / Bangalore

- Modernised a legacy jQuery customer portal with React and TypeScript, separating reusable UI, API integration and business rules.
- Delivered lost and stolen card replacement flows with end-to-end request tracking for customer self-service.

Ola Electric

Mar – Jul 2021

Senior Frontend Engineer / Bangalore

- Built the first Ola scooter's reservation portal and feature pages ahead of the July 2021 reservation opening, including the payment-return flow.

Tanish Raj

Experience, projects & skills

Experience

Rakuten

2020 – 2021

Frontend Engineer / Bangalore

- Built the Rakuten Card online application in React using test-driven development, reusable form components and shared validation rules.

CGI

2019 – 2020

Frontend Engineer I / Bangalore

- Delivered two modules within Shell's 35-module well-digitalisation platform using Vue.js, Vuex and Kendo UI, following SonarQube quality standards.

Thomson Reuters

2016 – 2018

Associate to Senior Web Developer / Bangalore

- Progressed from associate to senior in one year; built responsive sites and an award-winning internal Snippet Portal using Vue.js.
- Reduced page weight with shared CSS templates and image sprites; automated browser checks using Selenium WebDriver and Java.

Independent projects

Anubhav

Built and deployed a medical training logbook with seven roles, revision-linked faculty approvals and stored certification PDFs. Reduced the Dean's snapshot from 4.7 MB to 189 KB in a recorded test. Next.js, PostgreSQL, Docker.

Notivo

Built a notice monitor with queued email retries and manual review for ambiguous changes. A targeted index reduced rows read from 58,510 to 520 in the recorded lookup test. Node.js, SQLite, React.

Institutional CMS

Built a Payload CMS editorial platform with 61 page blocks, scoped editor permissions and Storybook documentation. Deployed the first client site at snmih.in.

Skills

Frontend / React, TypeScript, Next.js, Vue.js, React Native, HTML, CSS, Tailwind

Architecture / Design systems, Storybook, performance, accessibility (WCAG)

Data and backend / GraphQL, Apollo, Redux, REST, Node.js, PostgreSQL, Payload CMS

Quality and delivery / Jest, Vitest, Testing Library, Playwright, CI/CD, Docker

AI / LibreChat, generative UI, MCP servers, Claude Code

Education

Master of Computer Applications
Bangalore University, 2011–2014

Bachelor of Computer Applications
Integral University, 2008–2011
