Frontend engineer with ten years in banking, private credit and enterprise software. I build design systems and accessible interfaces, modernise legacy front ends, and for the last two years I've owned the backend as well. I work with AI agents most days and keep ownership of the architecture and the review.

EXPERIENCE

2024 – now · Abu Dhabi

Liquidity Capital · Senior Frontend Engineer

- Build finance-domain platforms with React, TypeScript, Vite, Redux, Apollo Client and GraphQL.
- Lead the migration of legacy frontend modules to a maintainable React and TypeScript architecture.
- Built a reusable design system and component patterns, and contributed to the rebrand across UI foundations.
- Building the firm's AI assistant on LibreChat, with our design-system components rendered inside the chat with live platform data.

2022 – 2024 · Dubai

Banque Saudi Fransi · Senior Frontend Engineer

- Built digital banking web and mobile apps, including the Customer Happiness Portal and the Digital Banking app, with React, TypeScript, Next.js and React Native.
- Led the frontend rebrand across legacy banking platforms with one design language.
- Improved performance with code splitting, lazy loading and render optimisation, and set up CI/CD, monitoring and alerting with DevOps.

2021 – 2022 · Bangalore

Wells Fargo · Frontend Engineer II

- Moved a legacy jQuery application to a React and TypeScript customer portal.
- Built lost and stolen card replacement flows with end-to-end request tracking.

Mar – Jul 2021 · Bangalore

Ola Electric · Frontend Engineer

- Built the reservation portal and feature pages for the first Ola scooter ahead of the July 2021 launch, which took more than 100,000 reservations in 24 hours.

2020 – 2021 · Bangalore

Rakuten · Frontend Engineer I

- Built the Rakuten Card online application in React, test-first, from reusable form parts and one shared set of validation rules.

2019 – 2020 · Bangalore

CGI · Frontend Engineer I

- Built two modules of a 35-module Vue, Vuex and Kendo UI platform for Shell's well engineers, each replacing a manual process, to SonarQube quality standards.

2016 – 2018 · Bangalore

Thomson Reuters · Associate Frontend Engineer

- Built responsive interfaces with HTML, SCSS and JavaScript, and the Snippet Portal, an internal tool for other developers.
- Received several awards for creativity, problem-solving, ownership and delivery.

INDEPENDENT WORK · IN PRODUCTION

Anubhav — E-logbook for postgraduate medical residents, built to NMC PGMER-2023. Seven roles, tamper-evident monthly sign-off and certified PDFs, ~275 end-to-end checks. Next.js 16, Postgres, Docker.

Notivo — Monitors the National Medical Commission's notices and emails new ones exactly once, despite an unreliable source. Node, SQLite, React.

Institutional CMS — Editorial platform on Payload, copied once per client: 61 blocks, 84 Storybook stories, fail-closed permissions. First client: snmih.in.

SKILLS

Frontend	React, TypeScript, Next.js, Vue, React Native, HTML, CSS, Tailwind
Architecture	Design systems, Storybook, micro frontends, system design, performance, accessibility (WCAG)
Data and backend	GraphQL, Apollo, Redux Toolkit, REST, Payload CMS, PostgreSQL, Prisma, Node
Quality and delivery	Jest, Vitest, Testing Library, Playwright, CI/CD, Docker, code review, mentoring
AI	Claude Code and AI agents in daily work, LLM interfaces

EDUCATION

Master of Computer Applications
Bangalore University, 2011–2014

Bachelor of Computer Applications
Integral University, 2008–2011
