Frontend engineer with ten years in banking, private credit and enterprise software. I build design systems and accessible interfaces, modernise legacy front ends, and for the last two years I've owned the backend as well. I work with AI agents most days and keep ownership of the architecture and the review.

## Experience

**2024 – now** · Abu Dhabi

**Liquidity Capital** · Senior Frontend Engineer

- Build a private credit platform in React, TypeScript, Vite, Redux and Apollo GraphQL; lead the migration of its legacy modules.
- Built the UI kit it runs on: Tailwind CSS 4, Storybook with a theme per brand, AG Grid Enterprise and a charts package. Carried the rebrand through it.
- Building the firm's AI assistant on LibreChat; our own components render inside the chat with live platform data.
- Building an MCP server over the design system, so coding agents can look up components and previews before they build.

**2022 – 2024** · Dubai

**Banque Saudi Fransi** · Senior Frontend Engineer

- Built the Customer Happiness Portal and the Digital Banking app with React, TypeScript, Next.js and React Native.
- Led the frontend rebrand across legacy banking platforms with one design language.
- Sped up pages with code splitting and lazy loading, and set up CI/CD, monitoring and alerting with DevOps.

**2021 – 2022** · Bangalore

**Wells Fargo** · Senior Frontend Engineer

- Moved a legacy jQuery application to a React and TypeScript customer portal.
- Built lost and stolen card replacement flows with end-to-end request tracking.

**Mar – Jul 2021** · Bangalore

**Ola Electric** · Senior Frontend Engineer

- Built the reservation portal and feature pages for the first Ola scooter ahead of the July 2021 launch, which took more than 100,000 reservations in 24 hours.

**2020 – 2021** · Bangalore

**Rakuten** · Frontend Engineer

- Built the Rakuten Card online application in React, test-first, from reusable form parts and one shared set of validation rules.

**2019 – 2020** · Bangalore

**CGI** · Frontend Engineer I

- Built two modules of a 35-module Vue, Vuex and Kendo UI platform for Shell's well engineers, each replacing a manual process, to SonarQube quality standards.

**2016 – 2018** · Bangalore

**Thomson Reuters** · Associate to Senior Web Developer

- Associate to senior in a year. Built responsive sites in HTML, SCSS and JavaScript, and the award-winning Snippet Portal in Vue.
- Cut page weight with shared CSS templates and image sprites, and wrote browser automation with Selenium WebDriver in Java.

## Independent work · in production

**Anubhav** — E-logbook for postgraduate medical residents, built to NMC PGMER-2023. Seven roles, tamper-evident monthly sign-off and certified PDFs, ~275 end-to-end checks. Next.js 16, Postgres, Docker.

**Notivo** — Monitors the National Medical Commission's notices and emails new ones exactly once, despite an unreliable source. Node, SQLite, React.

**Institutional CMS** — Editorial platform on Payload, copied once per client: 61 blocks, 84 Storybook stories, fail-closed permissions. First client: snmih.in.

## Skills

| | |
|---|---|
| Frontend | React, TypeScript, Next.js, Vue, React Native, HTML, CSS, Tailwind, AG Grid |
| Architecture | Design systems, Storybook, micro frontends, system design, performance, accessibility (WCAG) |
| Data and backend | GraphQL, Apollo, Redux Toolkit, REST, Payload CMS, PostgreSQL, Prisma, Node |
| Quality and delivery | Jest, Vitest, Testing Library, Playwright, CI/CD, Docker, code review, mentoring |
| AI | Claude Code and AI agents in daily work, LLM interfaces, generative UI, MCP servers |

## Education

**Master of Computer Applications**
Bangalore University, 2011–2014

**Bachelor of Computer Applications**
Integral University, 2008–2011
